

TECHNICAL DATA SHEET

Calcium Chloride Anhydrous

-CAS No.: 10043-52-4

-Molecular Formula: CaCl_2

-Appearance: White granular/powder

-Packing: 25 kg/bag, 1000kg/bag.

Specification:

Item	Standard
Purity (As CaCl_2)	94%
Sulfate (As CaSO_4)	0.2% max
Magnesium & Alkali Metal Chlorides (As NaCl)	4.0% max
FE	0.006%max
Alkalinity (As $\text{Ca}(\text{OH})_2$)	0.25% max
Water insoluble	0.2% max
PH of 10% solution@ 20°C	8-10

Application:

Anhydrous calcium chloride has strong hygroscopicity and is used as a desiccant for various substances. It is also used as a road dustproof, soil conditioner, refrigerant, water purifying agent and sizing agent. It is a widely used chemical reagent, pharmaceutical raw material, food additive, feed additive and raw material for manufacturing metal calcium.
